Columbia River Policy Review													
	Possible Policy Changes for 2020 and Beyond: Range of Alternatives (per Policy Issue or Option) for Analysis v 8/29/19												
	Policy Issue (or Option)		Alternatives										
			PRC Feb 26, 2019 Recommendation	Current Status Quo ¹	Alternative 1	Alternative 2	Alternative 3	Status					
Spring Chinook													
1	Recre	ational/Commercial allocation	70%/30%	80%/20% (OR); 70%/30% (WA)	60%/40%	Abundance based matrix		Active					
2	Allo	wable mainstem commercial gear	Tangle nets and alternative gear (any period), gill nets (post update)	Tangle nets (post update) (OR); Tangle nets and alternative gear (any period), gill nets (post update) (WA)	Non-tangle net alternative gear (any period)			Active					
3	Allocation of Upriver spring Chinook within recreational fisheries (Bonneville to OR-WA state line/ Snake River)		75%/25% (10%/15%)	75%/25% (10%/15%) (OR; WA)	65%/35% (15%/20%)	85%/15% (5%/10%)	75%/25% (10%/15%), plus 500 fish to Snake River from lower river	Active					
4	f	ide improved season stability or Upriver spring Chinook ecreational fisheries, via: ²	Not addressed	No stability measures beyond the provisions shown below									
	3	Lower river buffer only			Lower river buffer only			Active					
	4	Upriver season set			Upriver season set			Active					
	8	No lower river extension			No lower river extension			Active					
5	Allocation of unused commercial impacts		Not addressed	To escapement (OR); No restrictions (WA)	To escapement	No restrictions		Active					

¹ Current Status Quo reflects each state's corresponding policy/rules as of August 1, 2019.

² See below for expanded phrasing on Upriver spring Chinook stability issue options
3 Apply buffer only to fisheries below Bonneville Dam

4 Establish a set season above Bonneville Dam

8 No lower river extension beyond pre-season plan

	Alternatives												
Policy Issue (or Option)	PRC Feb 26, 2019 Recommendation	Current Status Quo ¹	Alternative 1	Alternative 2	Alternative 3	Status							
Recreational/Commercial allocation downstream of Priest Rapids Dam	70%/30%	80%/20% (OR); 70%/30% (WA)	50%/50%	Abundance based matrix		Active							
Allocation of unused commercial impacts	Not addressed	To spawning escapement (OR); to upriver recreational fisheries or spawning escapement (WA)	Unused impacts allocated to spawning escapement	Unused impacts allocated to upriver recreational fisheries or spawning escapement		Active							
Allowable mainstem commercial gear	Gill net and alternative gear	Alternative gear (OR); Gill net and alternative gear (WA)				Active							
Definition of harvestable surplus below Priest Rapids Dam	Not addressed	U.S. v OR Management Agreement harvest rate schedule	Only if forecast > spawning escapement over Priest Rapids Dam			Inactive							
		Fall Chin	ook										
Recreational/Commercial allocation of most constraining fall Chinook	≤70%/≥30%	≤70%/≥30% (OR; WA)	≤80%/≥20%	≤65%/≥35%		Active							
Allowable mainstem commercial gear	Gill net (any Zone) and alternative gear	Gill net (Zone 4/5) and alternative gear (OR); Gill net (any Zone) and alternative gear (WA)	Alternative gear			Active							
•		Coho		· · · · · · · · · · · · · · · · · · ·									
Recreational/Commercial allocation	Prioritization by fishery segment	Prioritization by fishery segment (OR; WA)	numerical allocation			Inactive							
Allowable mainstem commercial gear	Gill net, tangle net and alternative gear	Tangle net and alternative gear (OR); Gill net, tangle net and alternative gear (WA)	Non-tangle net alternative gear			Active							
l			asures	I									
Limitation on recreational fishing guide/charter licenses	Not addressed	No limitations (OR); No guides below Longview Bridge (WA)	Pursue guiding limitations			Inactive							
program	Not addressed	Not addressed (OR); Pursued (WA)	Pursue gill net license buyback program			Inactive							
Hatchery production goals	Not addressed					TBD							
Increase alternative gear development/implementation	Not addressed	Pound net testing and rule making to legalize pound net and seines (WA)				TBD							
	Recreational/Commercial allocation downstream of Priest Rapids Dam Allocation of unused commercial impacts Allowable mainstem commercial gear Definition of harvestable surplus below Priest Rapids Dam Recreational/Commercial allocation of most constraining fall Chinook Allowable mainstem commercial gear Recreational/Commercial allocation Allowable mainstem commercial gear Limitation on recreational fishing guide/charter licenses Commercial license buyback program Hatchery production goals	Recommendation Recreational/Commercial allocation downstream of Priest Rapids Dam 70%/30% Allocation of unused commercial impacts Not addressed Allowable mainstem commercial gear Gill net and alternative gear Definition of harvestable surplus below Priest Rapids Dam Not addressed Recreational/Commercial allocation of most constraining fall Chinook ≤70%/≥30% Allowable mainstem commercial gear Gill net (any Zone) and alternative gear Recreational/Commercial allocation of most constraining fall Chinook ≤70%/≥30% Allowable mainstem commercial gear Gill net (any Zone) and alternative gear Recreational/Commercial allocation of most constraining fall Chinook Segment Allowable mainstem commercial gear Gill net (any Zone) and alternative gear Intraction on recreational fishing guide/charter licenses Not addressed Umitation on recreational fishing guide/charter licenses Not addressed Commercial license buyback program Not addressed Not addressed Not addressed Increase alternative gear Not addressed	Recommendation Current Status Quo ¹ Recreational/Commercial allocation downstream of Priest Rapids Dam 70%/30% 80%/20% (OR); 70%/30% (WA) Allocation of unused commercial impacts Not addressed To spawning escapement (OR); to upriver recreational fisheries or spawning escapement (WA) Allowable mainstem commercial gear Gill net and alternative gear Alternative gear (OR);
