License

(1) It is unlawful to take, fish for, land, or deliver shrimp taken for commercial purposes with pot gear from Puget Sound waters without a valid Puget Sound shrimp pot license.

A Puget Sound shrimp pot license will only be issued to an individual who is a natural person, and this person shall be the primary operator. Holders of Puget Sound shrimp pot licenses may designate a single alternate operator per license.

Pot Gear and area

(2) It is unlawful to fish for shrimp for commercial purposes in Puget Sound using shellfish pot gear except during seasons opened by emergency rule.

(3) Gear restrictions in all areas, maximum 100 pots per fisher except for dual licensees as provided for in RCW [77.70.410](#).

(4) Buoy requirements, in all areas:

(a) Buoys must be orange in color and consist of durable material that will remain floating on the surface with five pounds attached; bleach or antifreeze bottles or other containers may not be used as floats.

(b) Buoys must be marked with the clear identification of the license holder and the vessel designated on the Puget Sound shrimp pot license.

(c) When two or more shrimp pots are attached to a common ground line, the number and type of pots (spot shrimp or nonspot shrimp pot) so attached must be clearly labeled on the required buoy.

(d) The line attaching the pot to the buoy must be weighted sufficiently to prevent the line from floating on the surface.

(5) Pot requirements, in all areas:

(a) A shrimp pot may not exceed a maximum of 153-inch bottom perimeter and a maximum of 24-inch height.

(b) The entire top, bottom, and sides of the shrimp pot must be constructed of mesh material. Use of liners is prohibited.

(c) Entrance tunnels to shrimp pots may be constructed of any size mesh material. All entrance tunnels must open into the pot from the side.

The sum of the maximum widths of all entrance tunnel openings must not exceed half of the perimeter of the bottom of the pot.

(d) Spot shrimp may only be harvested using pots with a minimum mesh size of one inch. Mesh size of one inch is defined as a mesh opening that a 7/8-inch square peg will pass through, excluding the entrance tunnels, except for flexible (web) mesh pots, where the mesh must be a minimum of 1 3/4 inch stretch measure. Stretch measure is defined as the distance between the inside of one knot to the outside of the opposite vertical knot of one mesh, when the mesh is stretched vertically.

(e) Nonspot shrimp may only be harvested using pots with a minimum mesh size 1/2 inch. Mesh of 1/2 inch is defined as a mesh that a 3/8 inch square peg will pass through, excluding the entrance tunnels, except for flexible (web) mesh pots, where the mesh must be at a minimum 1 1/8 inch stretch measure. Stretch measure is defined as the distance between the inside of one knot to the outside of the opposite vertical knot of one mesh, when the mesh is stretched vertically.

(6) Harvest restrictions, all areas:

(a) It is unlawful to set or pull shrimp pot gear from one hour after official sunset to one hour before official sunrise.

(b) It is unlawful to deploy spot shrimp pots and nonspot shrimp pots concurrently within the same Catch Reporting Area, with the following exceptions:

(i) Spot and nonspot shrimp pots may be concurrently deployed in Catch Area 23A but not within the same subarea (23A-E, 23A-W, 23A-C, or 23A-S) concurrently.

(ii) Nonspot pots may be deployed within Sequim Bay CSMA (WAC [220-320-120](#)) concurrently with spot shrimp pots deployed in the remaining portion of Catch Area 25A outside of Sequim Bay CSMA.

(iii) All shrimp harvested must be landed and recorded on a shellfish receiving ticket before subsequent harvest may occur.

(c) Each fisher or alternate operator is required to report their intended catch area of harvest, target species (spot or nonspot), and an estimate of total pounds that are being targeted prior to the deployment of any shrimp gear by email or text message to shrimp.report@dfw.wa.gov, or by using the Puget Sound commercial shrimp reporting website.

(d) It is unlawful to harvest nonspot and spot shrimp in the same day.

(e) It is unlawful to harvest shrimp in more than one catch area per day, except for concurrent pot deployment described in (b) of this subsection.

(f) Nonspot shrimp pot harvest restrictions:

(i) Harvest of nonspot shrimp is not permitted deeper than 175 feet in Shrimp Management Area 2E.

(ii) Harvest of nonspot shrimp is not permitted deeper than 150 feet in Region 2W.

Reporting

(7) All shrimp taken in the Puget Sound commercial shrimp fishery must be landed and recorded on Washington state fish receiving tickets within 24 hours of harvest. No fisher may land shrimp without immediate delivery to a wholesale fish buyer, or if transferred at sea, without transfer to a wholesale fish buyer. A fisher who is a wholesale fish buyer or a limited fish seller may complete and return a fish receiving ticket to satisfy the requirements of this subsection.

You can select up to **FOUR** undesignated crewmember licenses:

Resident Crewmember License [Qty_____ x \$35 = \$_____]

Non-Resident Crewmember License [Qty_____ x \$110 = \$_____]

You can select up to **TWO** Albacore Tuna crewmember licenses:

Albacore Tuna Crew License [Qty_____ x \$35 = \$_____]
