---

Morgan Dorner, SEPA Coordinator  
Washington Department of Ecology

The Washington Department of Fish and Wildlife (WDFW) appreciates the comments and direction that The Department of Ecology (Ecology) has provided in review of our proposed project on the John's River Wildlife Area in Grays Harbor County (Ecology File #: 201902469). These comments have been shared with WDFW staff assigned to complete the proposed project. There are no known contaminants at the Wildlife Area or within the area impacted by the project; however, if any contaminated soils are discovered during ground disturbing activities, work will stop and Ecology will be notified. In addition, the proposed work would not disturb more than 1 acre or otherwise trigger the need for a Construction Stormwater Permit. Appropriate erosion control measures will be installed on site prior to any ground disturbing work.

Thank you for reviewing the SEPA and providing the appropriate Ecology staff contact information.

Sincerely,

*Brian Calkins*  
Region 6 Wildlife Program Manager  
48 Devonshire Road  
Montesano, WA 98563  
360-249-1222
