STATE LISTED SPECIES

Revised June 2019

The Washington Fish and Wildlife Commission has classified the following 45 species as Endangered, Threatened, or Sensitive. The federal status of species under the Endangered Species Act differs in some cases from state status; federal status is indicated by: Federal Endangered (FE), Threatened (FT), Candidate (FC), or Species of Concern (FSC).

STATE ENDANGERED <i>A species native to the State of Washington that is seriously threatened with extinction throughout all or a significant portion of its range within the state.</i> The 32 State Endangered species are designated in Washington Administrative Code 220-610-010	STATE THREATENED <i>A species native to the state of Washington that is likely to become endangered within the foreseeable future throughout a significant portion of its range within the state without cooperative management or removal of threats.</i> The 7 State Threatened species are designated in Washington Administrative Code 220-200-100	STATE SENSITIVE <i>A species native to the state of Washington that is vulnerable or declining and is likely to become endangered or threatened in a significant portion of its range within the state without cooperative management or removal of threats.</i> The 6 State Sensitive species are designated in Washington Administrative Code 220-200-100

STATE CANDIDATE SPECIES

Revised June 2019

The Washington Department of Fish and Wildlife has designated the following 102 species as Candidates for listing in Washington as State Endangered, Threatened, or Sensitive. The Department reviews species for listing following procedures in Washington Administrative Code 220-610-110. The federal status of species under the Endangered Species Act differs in some cases from state status; federal status is indicated by: Federal Endangered (FE), Threatened (FT), Candidate (FC), or Species of Concern (FSC).
