Hello Gwen,

Thank you for your comment and review of the Cleman Forest Restoration project.

As part of this proposal, we will be installing a 60' vehicle bridge over Wenas Creek, a Type F water. As this is not considered a shoreland of the state, consultation with Yakima County for floodplain development permitting purposes is not required. Instead, we will be working with the Washington Department of Natural Resources via the Forest Practices permitting process, and the Washington Department of Fish and Wildlife through the Hydraulic Project Approval process.

Thank you again for your review of this project.

Brian Mize
