Re: Janicki Grass Carp
File# DNS 20-002, Ecology SEPA# 202000191

Dear Lisa Wood:

Thank you for the opportunity to provide comments on the **Janicki Grass Carp** project. Based on review of the State Environmental Policy Act (SEPA) checklist associated with this project, The Department of Ecology (Ecology) has the following comments:

There are two contaminated sites listed on Ecology's database within a one-mile radius of this location. Both of the sites are most likely hydrogeologically downgradient of this location.

Anacortes Mt. Vernon Meter Station (Facility Site ID No.: 4686639; Cleanup Site ID No. 4635) located on Turner Road in Mt. Vernon, is approximately 0.6 mile west-northwest of this location. This site was contaminated with metals confirmed in soil and received a No Further Action determination in 2006.

Northwest Pipeline BP Mt. Vernon C/S (Facility Site ID No.: 2684; Cleanup Site ID No. 4766) located at 15498 Lange Road in Mt. Vernon, is approximately 0.6 mile southwest of this location. The status of this site is 'cleanup started'. The site is contaminated with petroleum hydrocarbons and metals confirmed and suspected in soil, ground water and surface water.

Thank you for considering these comments from Ecology. If you have any questions or would like to respond to these comments, please contact Heather Vick from the Toxics Cleanup Program at (425) 649-7064 or by email at heather.vick@ecy.wa.gov.

Sincerely,

Katelynn Piazza
SEPA Coordinator
