

WDFW Lands 20/20 Public Review - 01/17/17

Project Description

The project goal for this site is to build a low water release site for native adult salmon and steelhead. The remainder of the site would be used as water access for fishing and boating.

Species /Habitat

- Chinook Salmon
- Coho Salmon
- Steelhead

Project Benefits

This site will provide fishing, river access and wildlife viewing. In the future it could provide a Salmonid release site as well as habitat.
