Subject: Re: Ecology's Comments - Skagit Wildlife Area Boat Launch Repair
Attachments: Skagit_WLA_Boat_Launch_Drawings.pdf; 202000827_ECYCommentLetter.pdf

Good afternoon,

Thank you for your comments on the SEPA for the WDFW Skagit Wildlife Area Boat Launch Repair project. I have attached both the comments and the project drawings for reference.

Section B.1.h: Temporary straw wattles will be installed around the construction area(s) to prevent sediment from entering the water. Please see sheet 10 of the drawings (attached). Please note that the drawings for the mitigation plan for both this project and for the Wiley Slough Dike Repair project are included at the end of the attached.

Section B.3.a1: The surface water body that the boat ramp accesses is an unnamed inlet off of the Skagit River.

Site Plan: Please see pages 3, 4, and 5 of the drawings for current and proposed site plans.
