Re: ECOLOGY COMMENTS: 202002686 FSEIS for Lake and Stream Rehabilitation - Rotenone Use and Health Risks

Dear Ms. Kincheloe:

WDFW has received The Department of Ecology's SEPA comment concerning the need for a water right permit for the construction of a diversion in our proposed treatment stream. We have consulted Herman Spangle in the Department of Ecology's Water Resources Program and received the following guidance on 6/16/2020 (correspondence attached):

"Since there will not be a beneficial use of the de-watering of the ponds around/over the beaver ponds, WDFW will not be required to obtain a short-term water right permit for this project. Thank you."

Thank you for reviewing the SEPA and providing the appropriate Department of Ecology staff contact information for guidance.

Sincerely,
Kenneth Behen
Warmwater Program Manager
