Main Office Location: Natural Resources Building, 1111 Washington Street SE, Olympia, WA

**Notice of Chemical Treatment (CFT Legumine)
For
Invasive Goldfish (*Carassius auratus*)**

Distribution Date: *September 8, 2020*

Washington Department of Fish and Wildlife (WDFW) will treat the isolated pond(s) near the south shoreline of West Medical Lake, Spokane County, October 6-9, 2020.

Product(s) planned for use: Prentox CFT Legumine Fish Toxicant (Rotenone).

Location of treatment(s): The treatment pond(s) are located between Fancher Road and the south shoreline of West Medical Lake (N 47.56162 W -117.70031) in Spokane County, WA. Maps below.

Reason(s): Eradicate invasive Goldfish (classified as “invasive/nonnative Regulated Type A species”). These pond(s) are currently adjacent to, but isolated from, West Medical Lake, and treatment is necessary to prevent Goldfish from entering the lake once water levels resume to full pool. This treatment will be conducted under permit:

1. WDFW’s National Pollution Discharge Elimination System (NPDES) Aquatic Invasive Species (AIS) Management General Permit No. WAG993002, which expires on September 15, 2021.

Additional informational signage will be deployed at and around the treatment pond(s).

If you would like to request additional notification prior to treatment, or have further questions, please contact Randall Osborne – District 2 Fish Biologist - Washington Department of Fish and Wildlife at 509-892-1001 extension 302 or randall.osborne@dfw.wa.gov .

Figure 1. Area which Washington Department of Fish and Wildlife will treat with CFT Legumine to eradicate non-native, invasive Goldfish *Carassius auratus*. The treatment area is isolated from West Medical Lake at the time of treatment.
