Commercial whale watching license and restrictions on commercial viewing of southern resident killer whales

Chapter 220-460 WAC
COMMERCIAL WHALE WATCHING

NEW SECTION

WAC 220-460-010 Definitions. For the purposes of this chapter, the following definitions apply:

(1) **Commercial whale watching.**

"Commercial whale watching" shall be defined as the act of taking, or offering to take, passengers aboard a vessel in order to view marine mammals in their natural habitat for a fee.

(2) **Commercial whale watching designated primary operator.**

"Commercial whale watching designated primary operator" shall be defined as the person identified on the application to operate the commercial whale watching vessel on behalf of the whale watching business.

(3) **Commercial whale watching alternate operator.**

"Alternate operators" shall be defined as individuals besides the designated primary operator who are designated to operate the vessel on behalf of the whale watching business.

(4) **Commercial whale watching vessel operators.**

"Commercial whale watching vessel operators" shall be defined to include operators of commercial vessels and kayak rentals that are engaged in the business of commercial whale watching. The term "operators" shall be used to identify primary operators and alternate operators who conduct commercial whale watching tours, including operators who direct the movement or positioning of any nonmotorized commercial whale watching vessels involved in a tour.

(5) **Commercial whale watching vessel.**

"Commercial whale watching vessel" shall be defined as any vessel that is being used as a means of transportation for individuals to engage in commercial whale watching.

"Vessel" includes aircraft while on the surface of the water, and every description of watercraft on the water that is used or capable of being used as a means of transportation on the water.

"Motorized commercial whale watching vessel" shall be defined as any vessel with an engine being used as a means of transportation for individuals to engage in commercial whale watching, regardless of whether the engine is in use. This definition includes sailboats with inboard or outboard motors.

"Nonmotorized commercial whale watching vessel" shall be defined as any vessel without an engine being used as a means of transportation for individuals to engage in commercial whale watching. This def-

inition includes human-powered watercraft such as kayaks and paddleboards.

(6) **Group of southern resident killer whales.**

"Group of southern resident killer whales" is defined as a single southern resident killer whale or an assemblage of southern resident killer whales wherein each member is within one nautical mile of at least one other southern resident killer whale. Any individual(s) farther than one nautical mile constitutes a separate group.

(7) **Vicinity.** For the purposes of these rules, "vicinity" is defined as one-half nautical mile from all southern resident killer whales in the group. References to "vicinity" in this chapter do not permit operators to approach a southern resident killer whale closer than the statutorily defined distances in RCW 77.15.740.

(8) **Vicinity instance.** Each time any commercial whale watching vessel operating under a license enters within one-half nautical mile of a southern resident killer whale will count as one vicinity instance associated with that license.

(9) **Automatic identification system (AIS).** AIS refers to a maritime navigation safety communications system standardized by the International Telecommunication Union, adopted by the International Maritime Organization, that:

(a) Provides vessel information, including the vessel's identity, type, position, course, speed, navigational status and other safety-related information automatically to appropriately equipped shore stations, other ships, and aircraft;

(b) Receives automatically such information from similarly fitted ships, monitors and tracks ships; and

(c) Exchanges data with shore-based facilities.
