Jessica Eakens, Water Quality/Watershed Resources Unit
Washington State Department of Ecology
P.O. Box 47775
Olympia, WA 98504

Dear Jessica Eakens:

Thank you for the comment(s) regarding the Porrás Grass Carp Project (21-055) located at 38 Schafer Meadows Lane North as proposed by Mario Porrás.

As stated in the original grass carp application, Mr. Porrás previously installed an appropriate screening structure to prevent grass carp escapement into waters of the state. During the screening installation no sediment was delivered to waters of the state. The screening structure installation was recommended and overseen by the Grays Harbor area habitat biologist, Megan Tuttle. A five-year Hydraulic Project Approval will be completed by Megan Tuttle.

Please contact me if you have any further questions or comments.

Sincerely,

Kim Figlar-Barnes
