Re: SEPA Register 202200252, DNS 22-004

Dear Lisa Wood:

Thank you for the opportunity to comment on the Determination of Non Significance for the West Foster Creek Beaver Dam Analogs project. We have reviewed the documents and have the following comments.

### WATER QUALITY

Erosion control measures must be in place prior to any clearing, grading, or construction. These control measures must prevent soil from being carried by stormwater runoff into surface waters, or into stormwater drains that may discharge directly to surface water. Sand, silt, and soil will damage aquatic habitat and are considered pollutants.

If you have any questions concerning the Water Quality comments, please contact Wendy Neet at (509) 454-7277 or email at [wendy.neet@ecy.wa.gov](mailto:wendy.neet@ecy.wa.gov).

Sincerely,

Gwen Clear  
Environmental Review Coordinator

Thank you for contacting the Squaxin Island Tribe Cultural Resources Department regarding the above listed project for our review and comment. We have no specific cultural resource concerns for this project. However, if DAHP recommends a survey, or any other additional recommendations, we concur with DAHP's recommendations. We would prefer to receive an electronic copy by email once completed. If any archaeological or cultural resources are uncovered during implementation, please halt work in the area of discovery and contact DAHP and the Squaxin Island Tribe's Archaeologist, Shaun Dinubilo via email at [sdinubilo@squaxin.us](mailto:sdinubilo@squaxin.us).
