# **SEPA** ENVIRONMENTAL CHECKLIST

## Purpose of checklist:

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

## Instructions for applicants:

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown. You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to <u>all parts of your proposal</u>, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

#### Instructions for Lead Agencies:

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

#### Use of checklist for nonproject proposals:

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B plus the <u>SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS (part D)</u>. Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in Part B - Environmental Elements —that do not contribute meaningfully to the analysis of the proposal.

## A. Background [HELP]

- 1. Name of proposed project, if applicable: List the Cascade Red Fox as Threatened in the state of Washington in WAC 220-200-100.
- 2. Name of applicant: Washington Department of Fish and Wildlife, Taylor Cotten

3. Address and phone number of applicant and contact person: Taylor Cotten

P.O. Box 43141, Olympia, WA 98504-3200

t.cotten@dfw.wa.gov

Cell: 360-701-8787

4. Date checklist prepared: 5/4/2022

5. Agency requesting checklist: Washington Department of Fish and Wildlife

- 6. Proposed timing or schedule (including phasing, if applicable):
  Anticipate briefing the Fish and Wildlife Commission at the June 2022 commission meeting and for the commission to vote on and potentially adopt the change and take affect during the August 2022 meeting. Status Report is currently out for a 90 public comment period. WDFW expects the rule change will become permanent in fall 2022.
- 7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain. No
- 8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.

  The February 2022 WDFW Status Report for Cascade Red Fox provides biology, range, and threats for the species. <a href="https://wdfw.wa.gov/publications/02310">https://wdfw.wa.gov/publications/02310</a>
- 9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain. No
- 10. List any government approvals or permits that will be needed for your proposal, if known. Fish and Wildlife Commission approval is required for this new listing and changes to WAC 220-200-100. Authority and process for changes to the list of Threatened species is described in 220-610-110
- 11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)

  We are proposing to classify the Cascade Red Fox as Threatened in the state of Washington under authority described in WAC 220-610-110.

The Washington Department of Fish and Wildlife bases its proposal to classify Cascade Red Fox as Threatened on scientific information contained in its report *Washington State Status Report for the Cascade Red Fox*. This report summarizes evidence that the Cascade Red Fox population is threatened with extinction in the state and currently occupies less than 50% of it's historical range. The report recommends that the species be classified as Threatened species.

Lack of detections of Cascade red foxes in British Columbia in recent decades indicate that this species is now restricted to Washington. A southward range contraction appears to have occurred within Washington within recent decades, as the only known population now occurs in the South Cascades (south of the I-90 corridor). It now occurs within ≤ 50% of its historical range in the state.

The Cascade red fox is one of three subspecies of red foxes that occupy montane habitats in western North America. They are a smaller subspecies of red fox that has adapted to occupying cold high elevation environments year-round, where they use subalpine meadow, parkland, upper montane forest, and alpine habitats near the crest of the Cascade Range.

Our knowledge of the biology and ecology of the Cascade red fox is extremely limited. There are no estimates (historical or current) of total population size for the Cascade red fox in Washington. However, in the southern Cascades, a recent estimate indicated an effective population size of 16 foxes (95% CI 13.3-19.4), where effective population size can be thought of as the number of individuals in the population that produce the next generation. The apparent range contraction of the Cascade red fox over recent decades is likely to coincide with a lowering of overall abundance. Other aspects of the demography of the Cascade red fox (e.g., survival, fecundity, reproduction) are poorly understood.

There are a number of recognized threats that could affect the stability and persistence of the Cascade red fox population. These threats include small population size, limited genetic diversity, potential impacts of climate change (i.e., loss/fragmentation of habitat, increased predation/competition by coyotes as a result of a decreasing snowpack), potential impacts (e.g., competition, hybridization, disease transmission) of an invasion of non-native red foxes into their current range, and feeding of foxes by visitors at Mount Rainier National Park and other public areas.

Because its range appears to have contracted substantially, the Cascade red fox is now a Washington endemic, and is now confronted with a number of significant threats to its long-term viability. We therefore recommend that the Cascade Red Fox be listed as a Threatened Species in Washington State.

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist. Historically, the Cascade Red Fox occurred throughout the Cascade Range from southern Washington northward to southernmost British Columbia. A lack of recent detections in southern British Columbia suggests that this subspecies is restricted to the Cascade Range in Washington. Based on the distribution of recent verifiable detections of red foxes, the current range of the Cascade red fox in Washington is smaller than its historical range. It is now restricted primarily to Washington's southern Cascades from the Indian Heaven Wilderness in central Skamania County and Mount Adams in western Klickitat County north through the Goat Rocks Wilderness and Mount Rainier National Park, and as far north as the Norse Peak Wilderness and Manastash Ridge in southwestern Kittitas County. Affected counties include the extent of the possible range of the species in Washington: Okanogan, Whatcom, Skagit, Chelan, King, Kittitas, Pierce, Yakima, Lewis, Skamania, Klickitat Counties.

## B. Environmental Elements [HELP]

- 1. Earth [help]
- a. General description of the site:

(circle one): Flat, rolling, hilly, steep slopes, mountainous, other mountainous, and subalpine

- b. What is the steepest slope on the site (approximate percent slope)? Potentially very steep, the species occurs at higher elevations along the cascades, but predominantly inhabitat alpine and subalpine meadows and parkland Varies over the fox's range
- c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.

Varies over the fox's range

d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.

Varies over the fox's range

- e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.
   Not applicable
- f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe. Not applicable
- g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)? Not applicable
- h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any: Not applicable

#### 2. Air [help]

a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.

Not applicable

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

Not applicable

 c. Proposed measures to reduce or control emissions or other impacts to air, if any: Not applicable

#### 3. Water [help]

a. Surface Water: [help]

1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

Varies over the fox's range

2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

Not applicable

3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

Not applicable

4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

Not applicable

5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

Not applicable

6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.

Not applicable

- b. Ground Water: [help]
  - 1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

Not applicable

2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals. . . ; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.

- c. Water runoff (including stormwater):
  - 1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

2) Could waste materials enter ground or surface waters? If so, generally describe.

Not applicable

3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.

Not applicable

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

Not applicable

## 4. Plants [help]

a. Check the types of vegetation found on the site:

deciduous tree: alder, maple, aspen, other
evergreen tree: fir, cedar, pine, other
shrubs
grass
pasture
crop or grain
Orchards, vineyards or other permanent crops.
wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
water plants: water lily, eelgrass, milfoil, other
other types of vegetation
All of these types of vegetation could occur within the areas where foxes are found.

b. What kind and amount of vegetation will be removed or altered?

- c. List threatened and endangered species known to be on or near the site. Varies across fox's range, may include: Showy Stickweed, and Wenatchee Mountains checker-mallow which both may occur in historical Cascade Red Fox range.
- d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:

e. List all noxious weeds and invasive species known to be on or near the site.

Varies across fox's range

## 5. Animals [help]

a. <u>List</u> any birds and <u>other</u> animals which have been observed on or near the site or are known to be on or near the site.

## Examples include:

birds: hawk, heron, eagle, songbirds, other: mammals: deer, bear, elk, beaver, other:

fish: bass, salmon, trout, herring, shellfish, other \_\_\_\_\_

Varies across fox's range

b. List any threatened and endangered species known to be on or near the site. Varies across fox's range, may include: Gray wolf, Lynx, Northern Spotted Owl

c. Is the site part of a migration route? If so, explain.

Varies across fox's range

d. Proposed measures to preserve or enhance wildlife, if any:

Not applicable

e. List any invasive animal species known to be on or near the site.

Not applicable

#### 6. Energy and Natural Resources [help]

 a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

Not applicable

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

Not applicable

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any:

## 7. Environmental Health [help]

- a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal? If so, describe.
  - Describe any known or possible contamination at the site from present or past uses.
     Not applicable
  - 2) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.

Not applicable

 Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.

Not applicable

4) Describe special emergency services that might be required.

Not applicable

5) Proposed measures to reduce or control environmental health hazards, if any:

Not applicable

#### b. Noise

1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

Not applicable

2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.

Not applicable

3) Proposed measures to reduce or control noise impacts, if any:

## 8. Land and Shoreline Use [help]

a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

Not applicable

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

Not applicable

1) Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how:

Not applicable

c. Describe any structures on the site.

Not applicable

d. Will any structures be demolished? If so, what?

Not applicable

e. What is the current zoning classification of the site?

Not applicable

f. What is the current comprehensive plan designation of the site?

Not applicable

g. If applicable, what is the current shoreline master program designation of the site?

Not applicable

- h. Has any part of the site been classified as a critical area by the city or county? If so, specify. Varies across the fox's range.
- i. Approximately how many people would reside or work in the completed project?

Not applicable

j. Approximately how many people would the completed project displace?

k. Proposed measures to avoid or reduce displacement impacts, if any:

Not applicable

L. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:

Not applicable

m. Proposed measures to reduce or control impacts to agricultural and forest lands of long-term commercial significance, if any:

Not applicable

## 9. Housing [help]

 a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.

Not applicable

b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.

Not applicable

c. Proposed measures to reduce or control housing impacts, if any:

Not applicable

#### 10. Aesthetics [help]

a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?

Not applicable

b. What views in the immediate vicinity would be altered or obstructed?

Not applicable

c. Proposed measures to reduce or control aesthetic impacts, if any:

Not applicable

#### 11. Light and Glare [help]

a. What type of light or glare will the proposal produce? What time of day would it mainly occur?

b. Could light or glare from the finished project be a safety hazard or interfere with views?

Not applicable

c. What existing off-site sources of light or glare may affect your proposal?

Not applicable

d. Proposed measures to reduce or control light and glare impacts, if any:

Not applicable

#### 12. Recreation [help]

a. What designated and informal recreational opportunities are in the immediate vicinity?

Not applicable

b. Would the proposed project displace any existing recreational uses? If so, describe.

Not applicable

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

Not applicable

## 13. Historic and cultural preservation [help]

a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.

Not applicable

b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

Not applicable

c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

Not applicable

d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

## 14. Transportation [help]

a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

Not applicable

b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

Not applicable

c. How many additional parking spaces would the completed project or non-project proposal have? How many would the project or proposal eliminate?

Not applicable

d. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

Not applicable

e. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

Not applicable

f. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?

Not applicable

g. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

Not applicable

h. Proposed measures to reduce or control transportation impacts, if any:

Not applicable

#### 15. Public Services [help]

a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.

b.	Proposed measures	to reduce or	control	direct impacts	on public	services,	if anv	٧.
						,		,

Not applicable

<i>16.</i>	Utilities	<b>[hel</b>	ם

a.	Circle utilities currently available at the site:
	electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system
	other

Not applicable

d. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

Not applicable

## C. Signature [HELP]

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

Signature:		u
Name of signee _	Taylor Cotten	
Position and Agency/Organization _		Conservation Assessment Section Manager
Date Submitted:	5/4/2022	

# D. Supplemental sheet for nonproject actions [HELP]

(IT IS NOT NECESSARY to use this sheet for project actions)

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?

Proposed measures to avoid or reduce such increases are:

Not applicable

2. How would the proposal be likely to affect plants, animals, fish, or marine life? This proposal does not directly affect any plants, animals, fish, or marine life other than Cascade Red Fox. There is no direct effect on the Cascade Red Fox population, as this action is necessary to move towards recovering the species' populations. The Washington Department of Fish and Wildlife bases its proposal to classify Cascade Red Fox as threatened on scientific information contained in its report Washington State Status Report for the Cascade Red Fox. This report summarizes evidence that the Cascade Red Fox range is less than 50% of its historical extent, small effective populations size and is seriously threatened with extinction within its remnant range in the state. The report recommends that the species be classified as a threatened species.

Protective measures will go in effect for Cascade Red Fox in Washington if a listing of threatened is approved. The species would become listed under the state's list of threatened species and is protected from malicious harrassement.

Under Washington state law (described in WAC 220-610-110), Cascade Red Fox would be listed as protected wildlife. RCW 77.15.130 outlines that protected wildlife shall not be hunted, taken, or harassed nor shall their eggs or nests. Cascade Red Fox would also remain on the list of Priority Habitats and Species (PHS).

Proposed measures to protect or conserve plants, animals, fish, or marine life are: Listing the Cascade Red Fox as threatened wildlife.

3. How would the proposal be likely to deplete energy or natural resources?

Not applicable

Proposed measures to protect or conserve energy and natural resources are:

Not applicable

4. How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection; such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?

Proposed measures to protect such resources or to avoid or reduce impacts are:

Not applicable

5. How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?

Not applicable

Proposed measures to avoid or reduce shoreline and land use impacts are:

6. How would the proposal be likely to increase demands on transportation or public services and utilities?

Not applicable

Proposed measures to reduce or respond to such demand(s) are:

Not applicable

7. Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.

While not a true conflict with any local, state, or federal laws, if the Cascade Red Fox is classified as threatened, the state status will be different than the federal status. Cascade Red Fox are not protected under the federal Endangered Species Act.
