

# Sol Duc Access Clallam County

This WDFW project is to acquire 38.12 acres just north of Forks, Washington in Clallam County. The property is a combination of forest and natural vegetation and includes over 2,600 feet of water frontage on the Sol Duc River with nearly 1,500 feet of easily accessible fishing and water recreational opportunities. This replaces a nearby existing water access area that has been washed away by shifts in the river.

The project is supported by the City of Forks, The Puget Sound Anglers, and the Olympic Peninsula Fly Fishers.
