Subject: SEPA comment for Lowe Grass Carp Project (22-046)
Date: Thursday, November 10, 2022 10:47:50 AM

Thank you for your comments on the proposal to stock grass carp (*Ctenopharyngodon idella*) into the Lowe pond. WDFW is recommending approval for the applicant to stock a small number of triploid (sterile) grass carp into an existing pond. As such, no construction, excavation, grading, or other disturbances will take place in association with this permit. The small number of fish are not expected to influence the water quality of any discharge to State waters.

Please let me know if you have any additional comments or questions.
