

## Processing Mineral Prospecting HPAs May 11, 2018

### **PROCESSING HPAs SOLELY FOR SUCTION DREDGING**

When drafting the provisions in APPS for an HPA solely for suction dredging, select the “**Template – Freshwater**” Provision Group, then select the “**FRESHWATER MINERAL PROSPECTING – SUCTION DREDGING**” Provision that is at the bottom of the list. Associate the only provision that is presented as an option and associate it to the HPA.

**Figure 1: Select the correct template provision file in APPS**

In the refreshed screen, click on “**Edit**” and address all of the edits needed that are identified in ALL CAP FONT. Be sure to delete any ALL CAPS instructions from the draft provisions so they don’t display on the final HPA (but leave section or provision headers that are also in ALL CAPS). Do not alter any provisions without ALL CAPS. It should be rare that you need to add any additional provisions due to the unique circumstances of the site or activity. If you think additional provisions are necessary, consult with your supervisor. Save your changes and view the finished draft. When satisfied with the final version, approve and issue the HPA.

Character limit for each provision is set to 50,000. If you are entering provision details containing more than 50,000 characters, please split it into multiple provisions as necessary.

Description

You must work under the plans and specifications in your Hydraulic Project Approval application dated **INSERT DATE HERE**, and approved by Washington Department of Fish and Wildlife, except as modified by this Hydraulic Project Approval. You must have a copy of that application and this HPA with you or on the job site when mineral prospecting and placer mining.

2. ALLOWED WORK AREAS:

**ADD CLAIM NAME OR STREAM NAME HERE**

Allowed Work Areas:

Section 1: Between **ADD DOWNSTREAM LAT/LONG OR OTHER IDENTIFIABLE BOUNDARY POINT HERE** and **ADD UPSTREAM LAT/LONG OR OTHER IDENTIFIABLE BOUNDARY HERE**

Section 2: Between **ADD DOWNSTREAM LAT/LONG OR OTHER IDENTIFIABLE BOUNDARY POINT HERE** and **ADD UPSTREAM LAT/LONG OR OTHER IDENTIFIABLE BOUNDARY HERE**  
REPEAT AS NEEDED TO COVER ALL SECTIONS BEING PERMITTED

3. TIMING LIMITATION: The project may begin **INSERT DATE HERE** and must be completed by **INSERT DATE HERE**; Provided:

a) Mineral prospecting at each location approved in this HPA may only occur between **INSERT DATE HERE** and **INSERT DATE HERE** of each calendar year.

b) Mineral prospecting at **INSERT LOCATION DESCRIPTOR SUCH AS CLAIM NAME HERE** may only occur between **INSERT DATE HERE** and **INSERT DATE HERE** of each calendar year.

Associate	ID	Description
<input checked="" type="checkbox"/>	3216	This Hydraulic Project Approval authorizes suction dredging and non-suction dredging methods for mineral prospecting and placer mining. APPLIES TO ALL PROJECTS CONDUCTED UNDER THIS HYDRAULIC PROJECT APPROVAL 2. Except for the provisions below for suction dredging, you must follow all of the requirements for mineral prospecting with timing restriction found in the current edition of the Washington Department of Fish and Wildlife (WDFW) Gold and Fish pamphlet when conducting mineral prospecting and placer mining during each permitted calendar year. When conducting suction dredging under this Hydraulic Project Approval, the requirements of the Gold and Fish pamphlet do not apply. You must also work under the plans and specifications in your Hydraulic Project Approval Application, dated INSERT DATE HERE, and approved by the WDFW, except as modified by this HPA. You must have a copy of these plans with you or on the job site while you work. 3. ALLOWED WORK AREAS: ADD CLAIM NAME OR STREAM...
