“GREEN SHEET”

Meeting: August 3-4, 2012

Agenda Item 9: 2012-13 Migratory waterfowl seasons and regulations – **Rule Briefing, Public Hearing, and Rule Action**

Prepared By: Don Kraege, Waterfowl Section Manager, Wildlife Program

Presented By: Don Kraege, Waterfowl Section Manager, Wildlife Program

Background:

Department staff will brief the Commission and request action on the proposed adoption of WAC 232-28-436 2012-13 Migratory waterfowl seasons and regulations, and the proposed repeal of WAC 232-28-435 2011-12 Migratory waterfowl seasons and regulations.

Migratory waterfowl season frameworks are established through ongoing interagency management programs involving the U.S. Fish and Wildlife Service (USFWS) and flyway organizations, including input from Canada, Russia, and Mexico. Federal frameworks for fall and winter waterfowl seasons are established in late July each year, and include maximum bag limits, season lengths, season timing, and other regulations. Pacific Flyway season frameworks follow harvest strategies and management plans that have been developed cooperatively by USFWS and the Pacific Flyway Council. All states adopt waterfowl seasons within federal frameworks, and in many cases are more restrictive to address regional conservation needs.

Management agencies utilize Adaptive Harvest Management (AHM) to establish duck season frameworks. AHM relies on annual survey information and population models to prescribe optimal regulation packages each year. The population of ducks in the western part of North America is managed separately from the eastern flyways, as part of the models developed for western mallard AHM. Western mallard AHM uses results from breeding surveys and other information from western areas rather than from the Canadian prairies, recognizing differences in Pacific Flyway breeding areas. The season packages proposed for western mallard AHM are the same as developed under mid-continent mallard AHM (liberal, moderate, and restrictive), although different models are used to prescribe annual packages.

Throughout North American survey areas, 2012 duck breeding populations are still benefitting from excellent wetland conditions that produced record high breeding index levels in 2011, and another record count was recorded in 2012. Unlike last year, western breeding areas also saw substantial increases in breeding populations. Certain species of ducks, including pintail, canvasback, and scaup, have received additional nationwide management emphasis due to population status and trends. These species have independent population models and harvest strategies developed cooperatively with USFWS, and rely on data not available until late July. Harvest strategies for scaup prescribe a liberal season for the Pacific Flyway in 2012-13, based on a significant increase in this population and more stable populations in western areas. Most breeding populations of geese that are important to Washington also showed increases in 2012.

Mandatory reporting of harvest information has been a requirement for brant, sea duck, and snow goose authorizations since these authorizations were developed. Accurate harvest information is an important part of our management programs for these species. As stated in the 2011-12 regulations process and the 2011-2012 Migratory Waterfowl and Upland Game Season Pamphlet, the department is recommending implementation of a \$10 penalty in 2013-14 for non-reporting during the 2012-13 season. This change was adopted for band-tailed pigeon hunting as part of the three-year season package process in April 2012. The proposed rule adds migratory bird harvest

record cards to the list of game harvest reports subject to a \$10 administrative fee for non-reporting. Currently this fee is applied for failing to report deer, elk, black bear, and turkey harvest. Harvest for these species is reported at a higher rate than for migratory bird authorizations. A hunter would only be penalized a maximum of \$10 during a license year if one or more mandatory harvest reports were not submitted.

Policy Issue(s) you are bringing to the Commission for consideration:

- Establishing waterfowl hunting seasons within frameworks established by the U.S. Fish and Wildlife Service, including the continuation of a 107-day season for ducks.
 - Standardizing non-reporting penalties for game species by implementing a \$10 administrative fee for noncompliance with migratory bird authorization reporting requirements.
-

Public involvement process used and what you learned:

These proposed recommendations were mailed to approximately 600 organizations and individuals for their review and consideration. Snow goose management recommendations were developed in consultation with the Fir Island Working Group. In addition, proposed recommendations were presented to the Waterfowl Advisory Group on June 16 at North Bend. These organizations and individuals were also informed of the opportunity to provide public testimony at the August 3-4, 2012 Commission Meeting in Olympia.

Action requested (identify the specific Commission decisions you are seeking):

Take public comment; adopt WAC 232-28-436 2012-13 Migratory waterfowl seasons and regulations; and repeal WAC 232-28-435 2011-12 Migratory waterfowl seasons and regulations, as presented.

Draft motion language:

I move to adopt WAC 232-28-436 2012-13 Migratory waterfowl seasons and regulations and repeal WAC 232-28-435 2011-12 Migratory waterfowl seasons and regulations as proposed.

Justification for Commission action:

These changes meet the approved criteria established by OFM, as a result of the Governor's Executive Order 11-03, as they are required to maintain a federally authorized program, affect a state revenue generating activity, and maintain opportunities for hunters.

authorization must review goose identification training materials and score a minimum of 80% on a goose identification test to receive authorization. Hunters who fail a test must wait 28 days before retesting, and will not be issued a reciprocal authorization until that time.

Immediately after taking any goose into possession, hunters must record in ink the information required on the harvest record card. Hunters must go directly to the nearest check station and have geese tagged when leaving a hunt site, before 6:00 p.m. All geese shall be presented intact and fully feathered at the check station. If a hunter takes the season bag limit of 1 dusky Canada goose or does not comply with requirements listed above regarding checking of birds and recording harvest on the harvest record card, authorization will be invalidated and the hunter will not be able to hunt geese in Goose Management Areas 2A and 2B for the remainder of the season and the special late goose season. Hunters qualifying for the season will be placed on a list for participation in this hunt. WDFW will assist landowners with contacting qualified hunters to participate in damage control hunts on specific lands incurring goose damage. Participation in this hunt will depend on the level of damage experienced by landowners. The special late goose season will be closed by emergency action if the harvest of dusky Canada geese exceeds 45 for the regular and late seasons. All provisions listed above for Goose Management Area 2A regarding authorization, harvest reporting, and checking requirements also apply to the special late season; except hunters must confirm their participation at least 24 hours in advance by calling the goose hunting hotline (listed on hunting authorization), and hunters must check out by 5:00 p.m. on each hunt day regardless of success. RECOMMENDED ADJUSTMENTS

The following adjustments are proposed since the Code Reviser (CR 102) filing and *are included* in your notebook.

Page 1

- Under the first section Ducks (Statewide), the restricted scaup season dates and bag limits have been removed due to increases in numbers of greater and lesser scaup, which are now above season liberalization thresholds.

REPEALER

The following section of the Washington Administrative Code is repealed:

ATTACHMENT A

WAC 232-16-440 Toppenish Creek Game Reserve

Purpose of the proposal and its anticipated effects, including any changes in existing rules:

This amendment is intended to eliminate the Toppenish Creek #2 reserve due to hydrology changes that have significantly reduced the value of the reserve to waterfowl.

Reasons supporting proposal:

The amendment will allow additional public hunting recreation for upland birds on U. S. Fish and Wildlife Service lands on the Toppenish National Wildlife Refuge.

WAC 232-28-436 2012-13 Migratory Waterfowl Seasons and Regulations.

Purpose of the proposal and its anticipated effects, including any changes in existing rules:

The new WAC specifies legal season dates, bag limits, and open areas to hunt waterfowl, coot, and snipe for the 2012-13 hunting season.

Reasons supporting proposal:

Waterfowl seasons and regulations are developed based on cooperative management programs among states of the Pacific Flyway and the U.S. Fish and Wildlife Service, considering population status and other biological parameters. The rule establishes waterfowl seasons and regulations to provide recreational opportunity, control waterfowl damage, and conserve the waterfowl resources of Washington.

WAC 232-28-283 Big game and wild turkey auction, raffle, and special incentive permits

Purpose of the proposal and its anticipated effects, including any changes in existing rules:

The proposal removes Game Management Unit (GMU) 186 and adds GMU 175 to the hunt area for the Rocky Mountain bighorn sheep raffle hunt. The anticipated effect is reduced bighorn ram harvest in GMU 186 and a slight increase in GMU 175.

Reasons supporting proposal:

The reason for the change to the hunt area is that the number of mature rams in GMU 186 has declined. GMU 175 has several mature rams and has recently experienced a disease outbreak. Reducing the number of rams in GMU 175 also may be helpful in terms of reducing the number of potentially wandering rams spreading the disease.
