The Change is needed Because

Allowing for the use of .209 shot primers in muzzle loader Hunting only assures a clean ignition fire of black powder or black powder substitute when you pull the trigger. It can eliminate Dangerous misfires that might go off later when pointed in a unsafe direction! My Muzzle Loader is Still a Single Shot Rifle that's Loaded From The Front of the Barrel 1 Shot at a time. I feel it should be my choice to hunt with it not others, You still have to find the animals your hunting and get close enough to shoot , if others want to hunt with musket caps or flit locks and round balls so be it! Look at how far the modern hunting rifle can shoot with scopes 1200 yards ? and the modern compound bows can out shoot the recurves , crossbows can out shoot the compound Bows, Then you also have shotgun slugs ? Still Leave the NO SCOPES RESTRICTION on Unless Your Hunting the Modern Weapons Seasons . ITS TIME TO AMEND THIS RULE! THANKS for YOUR TIME.
