Small Business Economic Impact Statement

Commercial salmon fishing, Puget Sound, 2015

1. Description of the reporting, record keeping, and other compliance requirements of the proposed rule:

These rules will incorporate the recommendations of the North of Falcon sub-group of the Pacific Fisheries Management Council to take harvestable salmon in Puget Sound while protecting species of fish, marine mammals, and sea birds listed as endangered. The rules include legal gear requirements, area restrictions, and open periods for commercial salmon fisheries occurring in Puget Sound.

2. Kinds of professional services that a small business is likely to need in order to comply with such requirements:

These rule changes clarify dates for anticipated open periods and areas for full-fleet and limited-participation salmon fisheries, and legal gear requirements for those fisheries. There are no anticipated professional services required to comply.

3. Costs of compliance for businesses, including costs of equipment, supplies, labor, and increased administrative costs:

The proposed rules adjust opening and closing dates. The proposed rules do not require any additional equipment, supplies, labor, or administrative costs. Therefore, there is no additional cost to comply with the proposed rules.

4. Will compliance with the rule cause businesses to lose sales or revenue?

The proposed rules do not affect the harvestable numbers of salmon available to non-treaty fleets. Therefore, the proposed rules should not cause any businesses to lose sales or revenue.

5. Cost of compliance for small businesses compared with the cost of compliance for the ten percent of businesses that are the largest businesses required to comply with the proposed rules using one or more of the following as a basis for comparing costs:

- 1. Cost per employee;**
- 2. Cost per hour of labor; or**
- 3. Cost per one hundred dollars of sales**

None - The proposed rules do not require any additional equipment, supplies, labor, or administrative costs.

6. Steps taken by the agency to reduce the costs of the rule on small businesses, or reasonable justification for not doing so:

Most businesses affected by these rules are small businesses. As indicated above, all of the gear restrictions proposed by the rules are identical to gear restrictions the Washington Department of Fish and Wildlife (WDFW) has required in past salmon fishery seasons. Therefore, the gear restrictions will not impose new costs on small businesses.

7. A description of how the agency will involve small businesses in the development of the rule.

As in previous years, WDFW interacts with and receives input from affected businesses through the North of Falcon process, which is a series of public meetings occurring from February through April each year. These meetings allow small businesses to participate in formulating these rules.

8. A list of industries that will be required to comply with the rule:

All licensed fishers attempting to harvest salmon in the all-citizen commercial salmon fisheries occurring in Puget Sound will be required to comply with these rules.

9. An estimate of the number of jobs that will be created or lost as a result of compliance with the proposed rule.

As explained above, these rules impose similar requirements to those for used in the previous years' commercial salmon fisheries. Compliance with the rules will not result in the creation or loss of jobs.
