Small Business Economic Impact Statement

Commercial salmon fishing, Grays Harbor, 2017

1. Description of the reporting, record keeping, and other compliance requirements of the proposed rule.

This proposed rule change incorporates the recommendations of the North of Falcon sub-group of the Pacific Fisheries Management Council to take harvestable salmon in Grays Harbor while taking reasonable and prudent measures to protect local salmon and steelhead stocks of concern and nonlocal species of fish listed under the federal Endangered Species Act as threatened or endangered. The rule includes legal gear requirements, area restrictions, and open periods for commercial salmon fisheries occurring in Grays Harbor.

2. Kinds of professional services that a small business is likely to need in order to comply with such requirements.

None – these rule changes clarify dates for anticipated open periods, show areas in Grays Harbor that are closed to commercial harvest methods, and explain legal gear requirements. There are no anticipated professional services required to comply.

3. Costs of compliance for businesses, including costs of equipment, supplies, labor, and increased administrative costs.

The proposed rule changes are similar to the requirements of the rule in previous years and primarily only adjust opening and closing dates. The proposed rule changes do not require any additional equipment, supplies, labor, or administrative costs. Therefore, there are no additional costs to comply with the proposed rules.

4. Will compliance with the rule cause businesses to lose sales or revenue?

The proposed rule changes do not affect the harvestable numbers of salmon available to commercial fisher licensed to fish in Grays Harbor. Therefore, the proposed rule changes should not cause any businesses to lose sales or revenue.

5. Cost of compliance for the ten percent of businesses that are the largest businesses required to comply with the proposed rules using one or more of the following as a basis for comparing costs:

The proposed rule changes do not require any additional equipment, supplies, labor, or administrative costs. Therefore, no costs for compliance are anticipated.

6. Steps taken by the agency to reduce the costs of the rule on small businesses or reasonable justification for not doing so.

Most businesses affected by these rule changes are small businesses. As indicated above, all of the gear restrictions proposed by the rules are identical to gear restrictions the Washington

Department of Fish and Wildlife (WDFW) has required in past salmon fishery seasons. Therefore, the gear restrictions will not impose new costs on small businesses.

7. A description of how the agency will involve small businesses in the development of the rule.

As in previous years, WDFW interacts with and receives input from affected businesses through the North of Falcon process, which is a series of public meetings occurring from February through April each year. These meetings allow small businesses to participate in formulating the agreements underlying these rules. Additionally, WDFW will allow for written public comment and hold a public hearing on these rule changes as required under the Administrative Procedures Act, Chapter 34.05 RCW.

8. A list of industries that will be required to comply with the rule.

All licensed fishers attempting to harvest salmon in the all-citizen commercial salmon fisheries occurring in Grays Harbor will be required to comply with the rule.
