EMERGENCY RULE

Under RCW 34.05.350 the agency for good cause finds:

- That immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.
- That state or federal law or federal rule or a federal deadline for state receipt of federal funds requires immediate adoption of a rule.
- That in order to implement the requirements or reductions in appropriations enacted in any budget for fiscal year 2009, 2010, 2011, 2012, or 2013, which necessitates the need for the immediate adoption, amendment, or repeal of a rule, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the fiscal needs or requirements of the agency.

Reasons for this finding: Fishing restrictions are necessary as the afternoon water temperatures in rivers and creeks are approaching or exceeding the upper limit for survival of trout and salmon. Most of these waters do not benefit from cold water releases from the Bureau of Reclamation storage reservoirs. These waters receive significant fishing effort that will subject trout to handling stress or injury caused by elevated water temperature and extreme low flow conditions. At this time, the Ahtanum Creek and Teanaway River basins are at critical low flow condition and require a complete fishing closure to protect vulnerable fish stocks. There is insufficient time to adopt permanent rules.
