#### NEW SECTION

## WAC 220-310-20000M Exceptions to statewide rules—Columbia River.

Notwithstanding the provisions of WAC 220-310-200, it is unlawful to violate the following provisions, provided that unless otherwise amended, all permanent rules remain in effect:

- (1) Effective May 27 through May 30, 2016 and June 3 through June 15, 2016.
  - (a) Open for fishing for salmonids. From the Tongue Point/Rocky Point Line upstream to 600 feet downstream of the fish ladder at the new Bonneville Dam powerhouse #2.
  - (b) HOWEVER, <u>closed to salmonid fishing from boats upstream of Beacon Rock</u> (defined as a deadline marker on the Oregon bank, located approximately four miles downstream from Bonneville Dam Powerhouse #1, projecting a straight line through the western tip of Pierce Island to a deadline marker on the Washington bank at Beacon Rock).
  - (c) Daily salmonid limit is 6 fish (hatchery Chinook or hatchery steelhead), of which no more than 2 may be adults and no more than 1 may be an adult Chinook.
  - (d) Release all wild Chinook, wild steelhead and sockeye.
  - (e) Salmon minimum size is 12 inches.

#### REPEALER

The following section of the Washington Administrative Code is repealed effective May 31, 2016:

WAC 220-310-20000M Exceptions to statewide rules—Columbia River.

### Attachment

The regulation extends the 2016 spring recreational salmon season in the Columbia River from Tongue Point/Rocky Point Line upstream to Bonneville Dam. ESA impacts for wild fish are available to recreational fisheries in order to access hatchery fish. The fishery is consistent with the *U.S. v Oregon* Management Agreement and the associated Biological Opinion. Conforms Washington state rules with Oregon state rules. Regulation is consistent with Compact Action of May 24, 2016. There is insufficient time to promulgate permanent rules.

Washington and Oregon jointly regulate Columbia River fisheries under the congressionally-ratified Columbia River Compact. Four Indian Tribes have treaty fishing rights in the Columbia River. The treaties preempt state regulations that fail to allow the Tribes an opportunity to take a fair share of the available fish, and the states must manage other fisheries accordingly. Sohappy v. Smith, 302 F. Supp. 899 (D. Or. 1969). A federal court order sets the current parameters for sharing between treaty Indians and others. United States v. Oregon, Civil No. 68-513-KI (D. Or.), Order Adopting 2008-2017 United States v. Oregon Management Agreement (Aug. 12, 2008) (Doc. No. 2546).

Some Columbia River Basin salmon and steelhead stocks are listed as threatened or endangered under the federal Endangered Species Act. On May 5, 2008, the National Marine Fisheries Service issued a biological opinion under 16 U.S.C. § 1536 that allows for some incidental take of these species in treaty and non-treaty Columbia River fisheries governed by the 2008-2017 <a href="U.S. v. Oregon">U.S. v. Oregon</a> Management Agreement. The Washington and Oregon Fish and Wildlife Commissions have developed policies to guide the implementation of such biological opinions in the states' regulation of non-treaty fisheries.

Columbia River non-treaty fisheries are monitored very closely to ensure compliance with federal court orders, the Endangered Species Act, and Commission guidelines. Because conditions change rapidly, the fisheries are managed almost exclusively by emergency rule. Representatives from the Washington and Oregon Departments of Fish and Wildlife convene public hearings and take public testimony when considering proposals for new emergency rules. WDFW and ODFW then adopt regulations reflecting agreements reached.
