EMERGENCY RULE

Under RCW 34.05.350 the agency for good cause finds:

- That immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.
- That state or federal law or federal rule or a federal deadline for state receipt of federal funds requires immediate adoption of a rule.

Reasons for this finding: This rule is needed to modify salmon and steelhead seasons and daily limits within Drano Lake. This rule also carries forward rules regarding salmon and steelhead seasons and daily limits for Cowlitz, Kalama, Klickitat and Wind Rivers, Salmon Creek previously put in place by emergency rule on March 3, 2021 in the filing of WSR 21-07-002. The previous rule for these waters is repealed by this filing in order to update Drano Lake:

Drano Lake was closed to salmon and steelhead angling in early May to ensure that expanded broodstock collection at Little White Salmon National Fish Hatchery (LWSNFH) was achieved. Hatchery managers have indicated that the broodstock collection goal for LWSNFH has been met, making continued closure of the salmon and steelhead fisheries unnecessary. While the hatchery goal for this facility has been met, shortfalls at other Columbia Basin hatcheries that can utilize 'Carson stock' remain uncertain, therefore managers are implementing a conservative daily limit to help support hatchery production throughout the region.

There is insufficient time to adopt permanent rules.
