EMERGENCY RULE

Under RCW 34.05.350 the agency for good cause finds:

- That immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.
- That state or federal law or federal rule or a federal deadline for state receipt of federal funds requires immediate adoption of a rule.

Reasons for this finding: This emergency rule is needed to close the commercial fishery in Willapa Bay Salmon Management and Catch Reporting Area 2N on September 12, 2021, Areas 2N and 2M on September 14, 2021, and Areas 2N, 2T, and 2U on September 18, 2021. The impacts of natural origin fall Chinook have been higher than preseason predictions. Based on preseason predictions and uncertainty around run sizes of Chinook in-season, a modification of the commercial fishery is necessary to help ensure that conservation objectives for Chinook are met. All other rules remain in effect.

For statistical week 36, the total impacts predicted preseason for natural origin Chinook was 24 fish. The estimated impacts for natural origin Chinook in-season for statistical week 36 was 39 fish. This is 163% of the pre-season prediction.

Immediate adoption of this rule is necessary for the preservation of the public health, safety, or general welfare. Observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest. There is insufficient time to adopt permanent rules.
