EMERGENCY RULE
Under RCW 34.05.350 the agency for good cause finds:
☒ That immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.
☐ That state or federal law or federal rule or a federal deadline for state receipt of federal funds requires immediate adoption of a rule.

Reasons for this finding: The U.S. v. Oregon Technical Advisory Committee recently updated the 2022 upriver spring Chinook return to 161,800. Additional spring Chinook directed angling opportunities are available. This rule modification re-opens the 2022 spring recreational salmon season in the Columbia River from the Rocky Point/Tongue Point line upstream to Bonneville Dam, including shad and hatchery steelhead. ESA impacts for wild fish are available to recreational fisheries in order to access hatchery fish. The fishery is consistent with the U.S. v Oregon Management Agreement and the associated Biological Opinion. Conforms Washington state rules with Oregon state rules. Regulation is consistent with Compact Action of May 11, 2022. The general public welfare is protected with the immediate and limited duration opening of recreational salmon fishing. This limited harvest allows for public use of the resource as well as the maintenance of a sustainable fish population.

allows for some incidental take of these species in the fisheries as described in the 2018-2027 U.S. v. Oregon Management Agreement.

Some Columbia River Basin salmon and steelhead stocks are listed as threatened or endangered under the federal Endangered Species Act. The Washington and Oregon Fish and Wildlife Commissions have developed policies to guide the implementation of such biological opinions in the states’ regulation of non-treaty fisheries.

Columbia River non-treaty fisheries are monitored very closely to ensure compliance with federal court orders, the Endangered Species Act, and Commission guidelines. Because conditions change rapidly, the fisheries are managed almost exclusively by emergency rule. Representatives from the Washington and Oregon Departments of Fish and Wildlife convene public hearings and take public testimony when considering proposals for new emergency rules. WDFW and ODFW then adopt regulations reflecting agreements reached. There is insufficient time to promulgate permanent rules.
