EMERGENCY RULE

Under RCW 34.05.350 the agency for good cause finds:

- That immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.
 That state or federal law or federal rule or a federal deadline for state receipt of federal funds requires immediate adoption of a rule.

Reasons for this finding: The purpose of this rule is to open ocean recreational salmon seasons in Marine Areas 1-4 in state waters in a manner consistent with federal salmon fishing regulations adopted by the National Marine Fisheries Service in response to actions taken by the Pacific Fishery Management Council (PFMC) to set annual salmon fishery harvest specifications and management measures; this action is intended to achieve regulatory consistency in federal and state waters for the ocean recreational salmon fishery, which operates in both areas.

The ocean recreational salmon fishing seasons are developed and considered through the annual Pacific Fishery Management Council (PFMC) process, which coincides with the North of Falcon salmon season setting process and is managed under the Pacific Coast Salmon Fishery Management Plan (FMP). By managing this fishery under the FMP, it is required to be consistent with National Standard Guidelines, which ensure conservation objectives are achieved as well as long-term fishery sustainability, and that the social and economic needs of fishing communities are taken into account.

Because the ocean recreational salmon fishery occurs in Pacific Ocean waters across multiple jurisdictions (states of Washington and Oregon, tribal, and federal), developing and considering ocean recreational salmon season options through PFMC ensures that fishing regulations are developed in a comprehensive, coordinated manner. Having consistent regulations in state and federal waters also promotes compliance with and enforcement of fishing regulations, particularly as anglers often fish in both state and federal waters on the same fishing trip.

While these regulations are being adopted through an emergency rule, the seasons described in these rules were developed and considered through an extensive open public process, which began early in 2022. The process includes multiple opportunities for public engagement—throughout the course of a three-month process, the public may: submit written

comments, provide testimony at the March and/or April PFMC meetings, attend public hearings held in each West Coast state, or provide comment through representation on the PFMC's Salmon Advisory Subpanel.

Following the April PFMC meeting, when these seasons were adopted, PFMC formally transmitted these regulations to the National Marine Fisheries Service (NMFS) for consistency determination. This transmittal occurred on April 28, 2022, and the NMFS final rule that opened this fishery was published on May 16, 2022. There was insufficient time for WDFW to adopt consistent regulations through the permanent rulemaking process.
