Agency: Department of Fish and Wildlife (Order 24-275)

Effective date of rule:

Emergency Rules

- Immediately upon filing.
- Later (specify)

Any other findings required by other provisions of law as precondition to adoption or effectiveness of rule?

- Yes
 - No
- If Yes, explain:

Purpose: The purpose of this emergency rule is to implement steelhead conservation measures in central coast and Grays Harbor tributaries. This rule will require the release of wild rainbow trout and will implement Selective Gear Rules (except only one single point barbless hook allowed) in all waters listed within the text of this filing.

Citation of rules affected by this order:

- New:
- Repealed:
- Amended: WAC 220-312-020
- Suspended:

Statutory authority for adoption: RCW 77.04.012, 77.04.020, 77.12.045 and 77.12.047

Other authority:

EMERGENCY RULE

Under RCW 34.05.350 the agency for good cause finds:

- That immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.
- That state or federal law or federal rule or a federal deadline for state receipt of federal funds requires immediate adoption of a rule.

Reasons for this finding: These emergency rules are necessary to protect wild steelhead stocks. Coastal wild steelhead runs have seen a negative trend for many years. Although there has been a recent increase on these populations, returns are still below long-term averages. Forecasts this year provide some additional opportunities, but precaution is necessary. The rules contained in this filing are expected to result in a reduction of wild steelhead encounters relative to permanent rules in place.

Enacting these rules follows an extensive public engagement process, which included a two-part virtual town hall series during the fall 2024. Hundreds of people joined WDFW fishery managers during these virtual meetings, and many provided feedback on the Department's coastal steelhead management web page through an online portal.

Tribal co-managers along the coast have also taken similar steps alongside the Department to advance recovery of wild steelhead.

WDFW continues to operate under its Statewide Steelhead Management Plan, which requires the Department to prioritize the sustainability of wild coastal steelhead runs by focusing on healthy levels of abundance, productivity, diversity, and distribution.

There is insufficient time to adopt permanent rules..
