<b>Grand Total</b>	<b>935,217</b>	<b>902,419</b>	<b>572,410</b>	<b>510,339</b>	<b>1,507,627</b>	<b>1,412,092</b>

Notes:

- 1) All forecasts are expressed in Ocean Age 3 (OA3) abundance units or the abundance of fish prior to fishing.
- 2) Columbia Early and Late Production Unit hatchery forecast categories include hatchery production from all states. Columbia Early and Late Wild Production Unit forecasts contain Washington-origin stocks plus Oregon wild Production Unit (accounts for entire return on OR side).
- 3) Oregon Wild Production Unit category is summarized separately from Columbia Early and Late categories because it is considered by ODFW to account for entire fall coho return on Oregon side of river.
