Fisheries under consideration: Treaty-Indian commercial salmon platform
Treaty Indian commercial sturgeon setline

*Detailed Stock status, forecasts, and management guidelines for 2014 fall fisheries were presented in Fall Fact Sheet #1 (July 29, 2014).*

**Stock Status and Management Guidelines**

- Updated Stock Status information was presented in Fact Sheet 12a.
- At the current projected run sizes, tribal fisheries are managed for a 30% total harvest rate on the river mouth run size of URB fall Chinook and a 20% harvest rate on the combined hatchery and wild B steelhead run size at Bonneville Dam.

**2014 Treaty-Indian Fisheries**

- Fall season platform and hook and line fishing has been open for both subsistence and commercial use since Aug. 1. Fishing continues to be open downstream of Bonneville in areas covered by MOU’s and MOA’s with the states, but there has been no observed tribal effort in the fall season.
- The fall season commercial gillnet fisheries consisted of nine weekly openings. The table below shows preliminary catch estimates through October 18.

</table>
• The projected URB harvest rate through October 18 is 20.8% including late fall impacts. The projected B steelhead harvest rate through October 18 is 13.2%. Even if the final post season B steelhead run size is as low as 38,000, the harvest rate through October 18 would only be 15.6%.

• Because the fishery will be open for subsistence regardless of sales, and commercial sales are not large this time of year, any additional catch associated with the allowance of sales should be small.

**Treaty Fishery Plan**

• The tribes met and agreed to extend the period when commercial sales are allowed for Zone 6 Platform and Hook and Line caught fish beyond October 31.

<td>Zone 6 and the area immediately downstream of Bonneville Dam as described in tribal/state MOUs and MOAs.</td>
</tr>
<tr>
<td>Gear:</td>
<td>Hoop Nets, Dip Nets, and hook and line</td>
</tr>
<tr>
<td>Sanctuaries:</td>
<td>Standard sanctuaries applicable to these gear types.</td>
</tr>
<tr>
<td>Allowable Sales:</td>
<td>Salmon (any species) steelhead, shad, yellow perch, bass, walleye, catfish and carp may be sold or retained for subsistence. Sturgeon may not be sold, but sturgeon from 43 to 54 inches fork length in The Dalles and John Day Pools and from 38 to 54 inches fork length in the Bonneville Pool may be kept for subsistence purposes. Legal sized sturgeon caught from platform or hook and line gear during any open commercial set line period in that pool may also be sold. Fish landed during any open commercial periods are allowed to be sold after the period concludes. In the area downstream of Bonneville Dam, sturgeon may not be kept or sold and sales of fish may not occur on USACE property.</td>
</tr>
<tr>
<td>Additional:</td>
<td>24-hour quick reporting required for Washington buyers, pursuant to WAC 220-69-240 except that landings must be reported within 24-hours of completing the fish ticket.</td>
</tr>
</tbody>
</table>

• The Zone 6 platform and hook and line fishery is expected to harvest very small numbers of fish during this time period.

• If the tribes open a fishery below Bonneville during this time period under the terms of MOU’s/MOA’s with the states, sales of fish caught in this fishery would be allowed. No sales are allowed on COE property. At this time, the tribes do not expect to have fisheries in this area.
2014 Fall Sturgeon Set line Fishery

- Only 345 sturgeon were harvested in 2014 winter season tribal commercial fisheries in The Dalles Pool. The 2014 commercial harvest guideline is 1,000. There are 655 fish remaining on the harvest guideline.

- The tribes have decided to allow a commercial setline fishery in The Dalles Pool to target these remaining fish as stated in the following:
