DETERMINATION OF NONSIGNIFICANCE (DNS)

Name of Proposal: ROCKPILE CREEK FIRE BARB WIRE FENCE RECONSTRUCTION

Description of Proposal: Reconstruction of approximately 10.3 miles of the barb wire fence that was damaged in the Rockpile Creek fire of 2007 will include demolition and removal of the existing damaged fence and construction in substantially the same alignment, using the same type materials.

Demolition will consist of removing burned wood fence materials and piling in stacks of 20 pieces, more or less, on WDFW property near the fence and removing steel fencing from the site. Construction will consist of driving steel tee posts in the ground where possible, and where the ground is rocky, drilling a 1.5" x 18" deep hole and driving a tee post in. Corners and stretch braces will be constructed from treated wood posts embedded 2.5' into the ground. When posts are in place the barbed wire will be stapled or clipped to the post. Some 12' wide wire drop gates will be installed. Where wood posts cannot be buried due to the rocky soil, rockjacks will be constructed to provide fence stability (see the drawings for a rockjack example). Due to the remote location of parts of this fence, materials may be brought to the fence site by helicopter. Equipment used will be restricted to hand operated tools only.

Please see attached plans for construction techniques and design.

Proponent/Applicant:
