

AMENDATORY SECTION (Amending Order 98-252, filed 12/16/98, effective 1/16/99)

WAC 220-110-206 Authorized work times and ~~((watercourses)) mineral prospecting equipment restrictions by specific state waters for mineral prospecting and placer mining projects ((by specific watercourse, except the Columbia and Snake rivers, lakes, salt waters and waters within National Park boundaries using Class I and II equipment)).~~ Mineral prospecting and placer mining ((using Class I and II equipment pursuant to WAC 220-110-203 and 220-110-204)) under WAC 220-110-202 shall only occur in ~~((watercourses)) the state waters, with the equipment restrictions, and during the times specified in the following table((†))~~.

(1) The general work time for a county applies to all ~~((streams))~~ state waters within that county, unless otherwise indicated ~~((under specific stream and tributary work times))~~ in the table.

(2) The work time for a listed ~~((stream))~~ state water applies to all its tributaries, unless otherwise indicated. Some ~~((streams flow through))~~ state waters occur in multiple counties. Check the listing for the county in which mineral prospecting or placer mining is to be conducted to determine the work time for that ~~((stream))~~ state water.

(3) Where a tributary is listed as a boundary, that boundary shall be the line perpendicular to the receiving stream that is projected from the most upstream point of the tributary mouth to the opposite bank of the receiving stream. ~~((†))~~ See Figure 1~~((†))~~.

~~((Figure 1. Stream boundary line))~~

~~((STRICKEN GRAPHIC~~

~~STRICKEN GRAPHIC))~~

Figure 1: Stream boundary line

(4) Mineral prospecting and placer mining within ~~((two hundred feet landward of the ordinary high water line in))~~ state waters listed as "submit application" ~~((or "closed" is))~~ are not authorized under the *Gold and Fish* pamphlet. Site review and a written HPA ~~((is))~~ are required for these state waters.

(5) Mineral prospecting using mineral prospecting equipment that has suction intake nozzles with inside diameters that should be four inches or less, but shall be no greater than four and one-quarter inches to account for manufacturing tolerances and possible deformation of the nozzle is authorized only in the listed state waters, and any tributaries to them, unless otherwise indicated in the table. The inside diameter of the dredge hose attached to the nozzle may be no greater than one inch larger than the nozzle size.

(6) Mineral prospecting using mineral prospecting equipment

that has suction intake nozzles with inside diameters that should be five inches or less, but shall be no greater than five and one-quarter inches to account for manufacturing tolerances and possible deformation of the nozzle is authorized only in the listed state waters in the following table. The inside diameter of the dredge hose attached to the nozzle may be no greater than one inch larger than the nozzle size. You may use only mineral prospecting equipment with suction intake nozzle inside diameters of four and one-quarter inches or less in tributaries of these state waters. The inside diameter of the dredge hose attached to the nozzle may be no greater than one inch larger than the nozzle size.
