

Tekison Creek Fish photos

Hello, my name is Kenneth E. Dubb. I would like to verify that I am the person who submitted digital images of what I believe were steelhead in Tekison Creek around 10 April 2010. I am positive that this observation was in Tekison Creek located in T20NR22E section 36. I observed 4 steelhead that were moving rapidly upstream in the section of the creek that flows approximately due south before turning east to enter the Columbia River. This section of the creek was about one half mile above the mouth.

Thank You
Kenneth E. Dubb
