DETERMINATION OF NONSIGNIFICANCE (DNS)

Name of Proposal: SPOKANE HATCHERY CULVERT REPLACEMENT

Description of Proposal:

This project consists of removal of two side by side culverts located at Spokane Hatchery. Water at this site originates from Griffith Spring and from outlet water from Spokane Hatchery. These culverts were installed during road construction over this waterway. These two 18 inch culverts have proved to be undersized and contribute to erosion to the roadway during high flow events. This roadway provides access to a state owned residence and emergency vehicle access must be maintained.

To maintain long term access to this residence both culverts will be replaced with a bridge. Culverts will be removed, the waterway will be restored to the original channel and the bridge installed.
