DETERMINATION OF NONSIGNIFICANCE (DNS)

Name of Proposal: TROY BERGER FLOOD CONTROL & SHORELINE PROTECTION

Description of Proposal: Redistribute up to 300 cubic yards of gravel and sand and place 40 cubic yards of large boulders for shoreline erosion control. The proposed project would remove gravel bar plugs from the entrances of three secondary channels and reduce flooding of adjacent property. The work will be done with a trackhoe during the low flow period and will be isolated from the flowing water of the creek with sand bag dams. The excavated gravel plug material will be dispersed in the adjacent shoreline in a manner that does not limit flood flow access to the floodplain.

Proponent/Applicant:
