DETERMINATION OF NONSIGNIFICANCE (DNS)

Name of Proposal: HUPP SPRINGS HATCHERY POLLUTION ABATEMENT & REARING PONDS

Description of Proposal:

This project includes construction of a pollution abatement system at Hupp Springs Hatchery to treat the waste flow that is generated from cleaning fish rearing ponds. The current hatchery footprint includes 4 10' X 100' raceways and one (60' x 140') large gravel bottom release pond. The proposed project will maintain the existing four (4) raceways, but demolish and replace the large release pond. The large release pond will be replaced with two (2) 20' X 120' concrete bottom rearing ponds. These two ponds will be built within the existing footprint of large release pond. This project also includes the installation of bird predation poles and netting to protect cultured fish against predation. In addition the proposed project will construct a vacuum cleaning system including a covered pollution abatement pond. All new construction is scheduled to occur within the existing hatchery footprint. New drain lines for this project will be tied into the existing hatchery effluent drain lines.
