**ADDENDUM 16-026 TO DETERMINATION OF NONSIGNIFICANCE (DNS) 14-033
DATED: MAY 15, 2014**

Name of DNS: DNS 14-033 KILBORN GRASS CARP

Description of Original Proposal: Plant triploid (sterile) grass carp into private pond, with no public access, to control aquatic vegetation. Future restocking may be necessary due to fish loss.

Description of Addendum 16-026: Proponent lost 4 out of 5 grass carp, originally stocked in her private pond in 2014, to predatory birds. Proponent requests to restock grass carp to control increased vegetation since the loss of the fish. The Environmental Checklist dated April 15, 2014, states that grass carp may be restocked only after 5 years. Current WDFW Grass Carp Policy (POL 5103) limits restocking to 5-year intervals, with the intent to not overstock the pond or lake. In this case, the Area Fish Biologist states that because the fish were removed from the pond, overstocking is not a concern and an exception is being made to the policy. Restocking with 5 additional fish is no threat to habitat or wildlife, and will not result in overgrazing.

Proponent/Applicant: Sherrie Kilborn
4109 Olson Dr. NW
Gig Harbor, WA 98335
(253) 858-8095

Location of Proposal, including street, if any: Unnamed Pond, Olson Drive, Gig Harbor, Washington, Pierce County; Township 21 North, Range 2 East WM, Section 19.

Lead Agency: Washington Department of Fish and Wildlife (WDFW)

This addendum is being distributed pursuant to WACs 197-11-600 and 197-11-625. The updated information provided above does not substantially change the analysis of significant impacts in the existing environmental checklist. Based on the original DNS and the updated information provided in this addendum, we have determined that a new threshold determination is not warranted. There is no comment period associated with this SEPA addendum.
