### REVISED DETERMINATION OF NONSIGNIFICANCE (DNS)

**Name of Proposal:** DNS 16-074: BARN FIELD TIDEGATE REPLACEMENT

#### Description of Proposal:

The proposed project will replace a tidegate that drains agricultural fields within the Skagit Wildlife Area Estuary Unit. The tidegate does not function properly and the dike is eroding. A setback dike will be built with the current dike being removed near project completion. A new 30-42" by 68' culvert will be installed under the new dike with a combination gate on the estuary side of the dike. Some contour grading of the estuary outlet will be done to create a more even flow channel. ~~Mitigation will be achieved in accordance with the Tidegate and Fish Initiative present in the area.~~ **Mitigation will be achieved off-site at North Leque Island with over 7 acres of estuarine restoration and enhancement.**
