DETERMINATION OF NONSIGNIFICANCE (DNS)

Name of Proposal: DNS 17-029: ROUND AND LONG LAKES BOAT RAMP REPAIR AND EXTENSION

Description of Proposal:

The Round and Long Lake WDFW Access Areas are located in the Aeneas Valley, Okanogan County, and are approximately ½ mile apart. They are both very similar in layout, containing a single concrete ramp, vault toilet, and gravel parking. Both sites are experiencing the same maintenance needs with broken ramp planks and eroded shoulder protection allowing the edges of the ramp to be undermined. Both ramps have also been totally out of water during summer months due to low lake levels and have been unusable during dry months. WDFW proposes to extend each ramp by 12 feet to allow year round launching and repair broken planks and damaged shoulder protection. The specific tasks are listed below:

1. Replace broken concrete ramp planks with new planks of the same size (12 feet long, 1 foot wide, 4 inches deep). There will be between 7 to 10 planks replaced on both Round and Long Lake ramps.
2. Place quarry spalls and crushed rock at the base of both ramps to fill in scour holes and serve as a base for the new planks. Round Lake will receive 9.8 cubic yards and Long Lake will receive 4.2 cubic yards of rock. This rock will be placed in the footprint of the new ramp extension and extend 1 foot beyond the edge of the planks for erosion control.
3. Install 12 new concrete ramp planks at the base of both ramps resulting in a 12 foot ramp extension. Ramp planks will be bolted together and anchored at edges.
4. Install quarry spalls on shoulders where previous rock placement has eroded away. 6 cubic yards of rock will be used at both Round and Long Lake for this shoulder repair.
