Subject: Durr Road Bridge SEPA Comment
Date: Thursday, December 07, 2017 10:53:06 AM

Hello Gwen, I am replying to a SEPA comment letter sent 10/30/2017 from ECY concerning the Durr Road Bridge Repair. The replies to both issues detailed in your letter are listed below:

Comment 1 - Suspended Sediment: WDFW will perform this project above the waters of Umtanum Creek and will not deliver turbidity to the stream. All small debris which may fall from the bridge repair project will be caught within a protective fabric barrier hung below the bridge. This project will not deliver sediment to the stream.

Comment 2 – Temperature: No vegetation will be removed or altered as a result of this project. All work will be restricted to the bridge structure. Sediment delivery from roads and road structures will be controlled during construction by erosion control measures around the work site and staging area.

Thank-you for your letter and sorry for the late reply. The WDFW biologist who submitted this SEPA Checklist is currently on extended leave. Take care,

Marty Peoples
