Re: Keller Ferry Dock Rehabilitation, File # 18-023

Dear Ms. Wood:

Thank you for the opportunity to comment on the Determination of Non-significance and Adoption of an Existing Environmental Document notice regarding the proposal to replace an existing 3,160 square-foot dock structure with a smaller 1,200 square-foot, steel framed dock on poly pontoons, with composite grated decking, gangway and repaired bulkhead. The project also includes construction of a 225 square-foot fuel sales office building, a fuel dispensary, and a sewer pump-out on the new dock system, as well as rerouting the fuel and electrical lines along ramp and gangway as needed (Proponent: National Park Service). The Department of Ecology (Ecology) has reviewed the documents and submits the following comments:

**Hazardous Waste and Toxics Reduction Program-Andrew Maher (509) 329-3612**

Wastes produced during construction or remodeling can be dangerous wastes in Washington State. Some of these wastes include: Absorbent material, aerosol cans, asbestos-containing materials, lead-containing materials, PCB-containing light ballasts, waste paint, waste paint thinner, sanding dust and treated wood.

The Common Construction and Demolition Wastes website has a more comprehensive list and a link to identifying and designating your wastes. This can be found on line at [http://www.ecy.wa.gov/programs/hwtr/dangermat/common\\_demo\\_wastes.html](http://www.ecy.wa.gov/programs/hwtr/dangermat/common_demo_wastes.html)

Responsibility for construction waste generated at a facility is the responsibility of the facility that generates the waste. More information about who is responsible for properly managing construction debris can be found at [http://www.ecy.wa.gov/programs/hwtr/dangermat/demo\\_responsibility.html](http://www.ecy.wa.gov/programs/hwtr/dangermat/demo_responsibility.html)

In order to adequately identify some of your construction and remodel debris, you may need to sample and test the wastes generated to determine whether they are dangerous waste. Information about how to sample and what to test for can be found at <http://www.ecy.wa.gov/programs/hwtr/dangermat/samplingDemoDebris.html>.

For more information and technical assistance, contact John Blunt at (509) 329-3525 or via email at [john.blunt@ecy.wa.gov](mailto:john.blunt@ecy.wa.gov).

**State Environmental Policy Act (SEPA)**

Ecology's comments are based upon information submitted for review. As such, they do not constitute an exhaustive list of the various authorizations that must be obtained or legal requirements that must be fulfilled in order to carry out the proposed action.

If you have any questions or would like to respond to these comments, please contact the appropriate staff listed above.
