DETERMINATION OF NONSIGNIFICANCE (DNS)

Name of Proposal: DNS 18-072: WENATCHEE LINE PIPE EXPOSURE REPAIR –
MILEPOST 131

Description of Proposal:

The scope of the project involves installing measures to control channel erosion and prevent future exposure of the natural gas pipeline. To mitigate for continued bank erosion, an approximately 7-foot high gabion basket retaining wall will be installed for a length of 87-linear feet within the channel. The retaining wall will be lined with geotextile filter fabric and backfilled with an imported gravel borrow material. Channel bed stability will be controlled utilizing a 3-foot diameter boulder grade control structure at the downstream extent of the project site. The pipeline crossing will be armored using an articulated concrete mattress. The rest of the affected channel will be built up to grade using enhanced scour protection material.
