Olympia, WA 98504

Re: Quincy Lake Boat Ramp Repair, File # 19-010

Dear Ms. Wood:

Thank you for the opportunity to comment on the Determination of Nonsignificance regarding the proposal to replace existing broken ramp planks and install a 12-foot ramp extension and 8 new planks to extend the ramp 12-foot further into water. (Proponent: Washington Department of Fish and Wildlife). The Department of Ecology (Ecology) has reviewed the documents and submits the following comments:

**Hazardous Waste and Toxics Reduction Program-Andy Maher (59) 329-3612**

Wastes produced during construction or remodeling can be dangerous wastes in Washington State. Some of these wastes include absorbent material, aerosol cans, asbestos-containing materials, lead-containing materials, PCB-containing light ballasts, waste paint, waste paint thinner, sanding dust and treated wood.

The Common Construction and Demolition Wastes website has a more comprehensive list and a link to identifying and designating your wastes. You can find this information on line at [http://www.ecy.wa.gov/programs/hwtr/dangermat/common\\_demo\\_wastes.html](http://www.ecy.wa.gov/programs/hwtr/dangermat/common_demo_wastes.html)

Responsibility for construction waste generated at a facility is the responsibility of the facility that generates the waste. You can find more information about who is responsible for properly managing construction debris at [http://www.ecy.wa.gov/programs/hwtr/dangermat/demo\\_responsibility.html](http://www.ecy.wa.gov/programs/hwtr/dangermat/demo_responsibility.html)

In order to adequately identify some of your construction and remodel debris, you may need to sample and test the wastes generated to determine whether they are dangerous waste. You can find this information about how to sample and what to test for at <http://www.ecy.wa.gov/programs/hwtr/dangermat/samplingDemoDebris.html>.

For more information and technical assistance with determining whether wastes are dangerous wastes in Washington, contact John Blunt at (509) 329-3525 or via email at [john.blunt@ecy.wa.gov](mailto:john.blunt@ecy.wa.gov).
