DETERMINATION OF NONSIGNIFICANCE (DNS)

Name of Proposal: DNS 19-010: QUINCY LAKE BOAT RAMP REPAIR

Description of Proposal:

The Quincy Lake Ramp needs maintenance and improvements to maintain safety and ramp functionality for boaters at Quincy Lake. These repairs and improvements include extending the ramp by 12 feet to allow launching during low water periods and replacing broken ramp planks. The specific tasks are listed below:

1. Grade footprint for 12 foot ramp extension. This will involve smoothing over a scour hole and berm and removing excess material. After the berm and scour hole have been leveled-out, a base layer of crushed rock will be placed as bedding for the new ramp planks.
2. Install 8 new planks at the base of the ramp to extend the ramp 12 feet further into the water.
3. Place a 1 foot wide strip of 2 inch minus crushed rock at the ramp edges for erosion control.
4. Replace three broken ramp planks on upper ramp with same style concrete planks.
