Thank you for your comment letter for the Lower Satsop Restoration project.

TOXICS CLEANUP:

We appreciate the contact information for contamination questions. We previously conducted testing on the spoils and did not find contaminants.

WATER QUALITY:

WDFW has applied for a NPDES permit and will obtain authorization prior to construction activities.

WETLANDS:

In addition, we have been working with Rick Mraz on wetland issues throughout preliminary studies and design work to assure a good wetland restoration outcome. We understand that Rick is vacationing on a tropical island and was unable to review the SEPA specifically. However, his involvement throughout the project planning has improved the project.

We appreciate the review and communication for this project. Please feel free to contact me if you have additional questions or concerns.
